Projects

TICKET MANAGEMENT: A web portal for generating tickets in QR code format for local events. Made on PHP, it takes the user input and generates the ticket with unique key. The QR code has information of all the details of the user and it can be printed too.

NOTICEMANIA: An online web portal for displaying notice to students for placement drives. The project used PHP and MySQL in the backend and the front page was made using Bootstrap. It has features to multicast the notice by virtue of which the rounds can be handled easily.

BANKING-SYSTEM: An online banking system was developed for cheque and demand draft along with team in which I designed the front end part.
